### HYDROGEN COUNCIL BACKS LATEST STEPS IN HUBS ROLL-OUT

**Melbourne, Australia:** The Australian Hydrogen Council (AHC) says the basic building blocks of a new hydrogen economy are being put in place with the latest announcement of more locations for hydrogen hubs, this time in Queensland.

The \$275 million provided to hubs in Gladstone and Townsville follow commitments to two facilities at Kwinana and The Pilbara in Western Australia (WA) last week and one in Darwin last weekend.

The Townsville hub is in addition to the seven that were part of a \$464m announcement in September last year.

AHC CEO Dr Fiona Simon said co-locating hydrogen users and producers in areas with access to port, road and rail infrastructure and potential pipeline easements is an important step forward for the hydrogen industry.

“These are the hubs we have to have if Australia is to become a global player in hydrogen production and exports by 2030,” said Dr Simon.

“They will drive the creation of regional jobs and build our export prosperity.

“It is a race and we’re at the starting gates with the flag raised.

“It’s now up to governments to work with stakeholders and local communities to ensure the hydrogen hub sites quickly move into planning and development phases.”

Dr Simon said hydrogen hubs serve an important role by grouping various users of hydrogen into defined areas.

“They minimise the cost of providing essential infrastructure and supports economies of scale,” Dr Simon said.

“The process of hubs producing and delivering hydrogen to end users will focus innovation and help build a ‘hydrogen-ready’ workforce.

“Locating the hubs so they have access to ports also enables the sector to develop as an export industry.

“We look forward to the unveiling of the remaining hub locations and working with industry and government to support the success of their roll-out,” Dr Simon concluded.

#### About Australian Hydrogen Council

The Australian Hydrogen Council is the peak representative body for the Australian hydrogen industry.

Members include Air Liquide, Aluminium Revolutionary Chassis Company, Ampol, ANZ Banking Group, APA Group, Arup, Arthur Phillips Pty Ltd, ATCO, Ark Energy, Aurecon, AusNet Services/Mondo, Australian Gas Infrastructure Group, AVEVA, Baker Hughes, BLK Auto, Bloom Energy, BOC, BP, Chart Industries, Chevron, CIP Aus Pty Ltd, Countrywide Renewable Hydrogen,

CEJN, Coregas, CS Energy, Cummins South Pacific, Clough, Daimler, Downer, Edify Energy, Emerson, Endeavour Petroleum, ENEA consulting, ENEOS Corporation, Engie, Energys, Ernst & Young,

EQUIS, Fortescue Metals Group, Fichtner Australia, Foton Mobility, GE Power, GeelongPort, GHD, Global Energy Ventures, H2U, Haskel, Hazer, HDF Energy, HRL Technology Group,

Honeywell, Horizon Power, Howden, Hyundai Australia, ITM Power, ITOCHU Australia Ltd, Jacobs, Jerrara Power, Jemena, John Cockerill Energy, KBR, Lochard Energy, Luxfer Australia, National Australia Bank, Nel, Norton Rose Fulbright, Marnco Pty Ltd, Origin Energy, Oli Capital, Quanta Services Australia, S&P Global Platts, Samson, SG Fleet, Siemens Energy, Silver Metal Investment, Southern Green Gas, Stanwell, Star Scientific, Sparc Technologies, Sumitomo Australia Pty Ltd, TFA Project Group, Toll Group, Total Eren, Toyota Australia, Transit Systems, TYMLEZ, UL International Australia, UPC\AC Renewables Australia, Valmec, Viva Energy, Weidmüller, Wesfarmers Chemicals, WSP Australia Pty Ltd, Woodside, Worley.
